## refreshingly different

An experienced, award winning photographer, Mike offers a refreshingly different approach. He has recently returned to Australia and may be the region's best kept wedding photography secret.

"I tell the visual story of a bride and groom on their wedding day with photographs that are fun, relaxed and full of emotion. It's all about allowing the couple to stay in the moment so they can appreciate the day and the people they have chosen to share it with.

*It's simple.*

No pretend cutting the cake or prompted smiles.

Meaningful and heartfelt moments happen naturally and I will be there to capture them. The result is photographs that convey the romance, the fun, nervous excitement, the details, characters and the sense of occasion, for you and for generations to come."
